

## Risk Management Conference 2021 – Conference Theme

### Getting paid for risk in a low yield world

In a low yield world, pension plans must take risks to meet their return targets. But how can plans ensure they're being compensated for the risks they take? And how can plan sponsors fully understand risks in a world filled with uncertainty? The 2021 Risk Management Conference will focus on risk management best practices and explore how pension plan sponsors can better embed risk considerations into their investment processes. Whether de-risking, re-risking or trying to stay the course, how can plan sponsors risk budget effectively and consider risk at the asset allocation level?
