

# What Science Can Do

At AstraZeneca, we believe in the power of what science can do to transform serious diseases like cancer, chronic kidney disease, diabetes, COPD, and asthma. Each and every one of us is bold in the belief that science should be at the centre of everything we do. It compels us to push the boundaries of what is possible: to trust in the potential of ideas and pursue them, alone and with others, until we have transformed the treatment of disease.
